

Business Plan to Add Service to Save the Children

Introduction

Hi, there! Starting with roughly BIF11,000,000 (USD4000), Save the Children can power a Service named “Chaperon the Unemployed and Job Seekers (CHAPUJOS)”?. We will start with a good laptop, a printer, and extensive knowledge in Database, Software engineering, project management, and business intelligence, specifically, discovery & portfolio planning. Most of the equipment is already available at Save the Children. All I need is BIF11,000,000 (USD4000), then I can launch the new *Chapujos* service.

Our portfolio

- ✓ Chaperon the unemployed and job seekers, who will go job hunting out in town wearing our chapujos uniform, armed with business intelligence protocols;
- ✓ Creating workshops at major marketplaces in the country. The reason is we are planning to add all tradespeople as members of the organization for our future projects involving tradespeople;
- ✓ Settling the tradespeople issues related to customers and goods through the *LaasEgrocery* brand;
- ✓ The Service will in the end use a Telecommunication Company to run another brand named *LaasEcard*, which will be operating our logistics infrastructures, i.e., *LaasElogistics*.

Financial Details over 24 months

Equipment	Price (BIF)	Price (USD)
Laptop, printer, paper, and transport fees	7,000,000	2400
Workshop at Kinama Marketplace	4,000,000	1400
Total	11,000,000	3800
