

Business Plan to Add Service to OBEM

Introduction

Hi, there! Starting with roughly BIF11,000,000 (USD4000), OBEM (“Office of Burundi for Employment and Manpower”) can power a Service named “Chaperon the Unemployed and Job Seekers (CHAPUJOS)” We will start with a good laptop, a printer, and extensive knowledge in Database, Software engineering, project management, and business intelligence, specifically, discovery & portfolio planning. Most of the equipment is already available at OBEM. All I need is BIF11,000,000 (USD4000), then I can launch the new *Chapujos* service.

By the way, please let Mbaririmana Boris (Phone: 76347287) pay me the remaining sum of BIF270,000 over OBEM website development. He is already 12 months late.

Our portfolio

- ✓ Chaperon the unemployed and job seekers, who will go job hunting out in town wearing our chapujos uniform, armed with business intelligence protocols;
- ✓ Creating workshops at major marketplaces in the country. The reason is we are planning to add all tradespeople as members of the organization for our future projects involving tradespeople;
- ✓ Settling the tradespeople issues related to customers and goods through the *LaasEgrocery* brand;
- ✓ The Service will in the end use a Telecommunication Company to run another brand named *LaasEcard*, which will be operating our logistics infrastructures, i.e., *LaasElogistics*. See <https://mwambaro.github.io/assets/creating-a-start-up.html>

Financial Details over 24 months
