Subject: Turning UN into World Federal Government.

Dear Sir/Madam,

Most leaders and tactical decision makers have come to appreciate opposition. Yet, they do not simply encourage the use of regular non-violent marketing strategies. They take advantage of this trend to carry out arms race. However, opposition parties are most of the time only looking for jobs. Since **Laastras** is to generate jobs for all through **SCoPS cooperatives** by means of **World Federal Government**, we are hereby encouraging them to bring the **World Federal Government** issue to the negotiation table with not only the government, but also with UN, along with the **UN Security Council**. Opposition parties might have been resorting to the use of armed forces. Hence, for all currently active rebel armed forces, we feel they might want to fire last shots before coming to the **World Federal Government** peacetalks table. So, we are advising them to adopt the **Al Baghdadi Opposition Coalition (Daech)** tactics as illustrated on the image below. Laastras Director will negotiate peace with both the governments and UN before the establishment of **World Federal Government**.

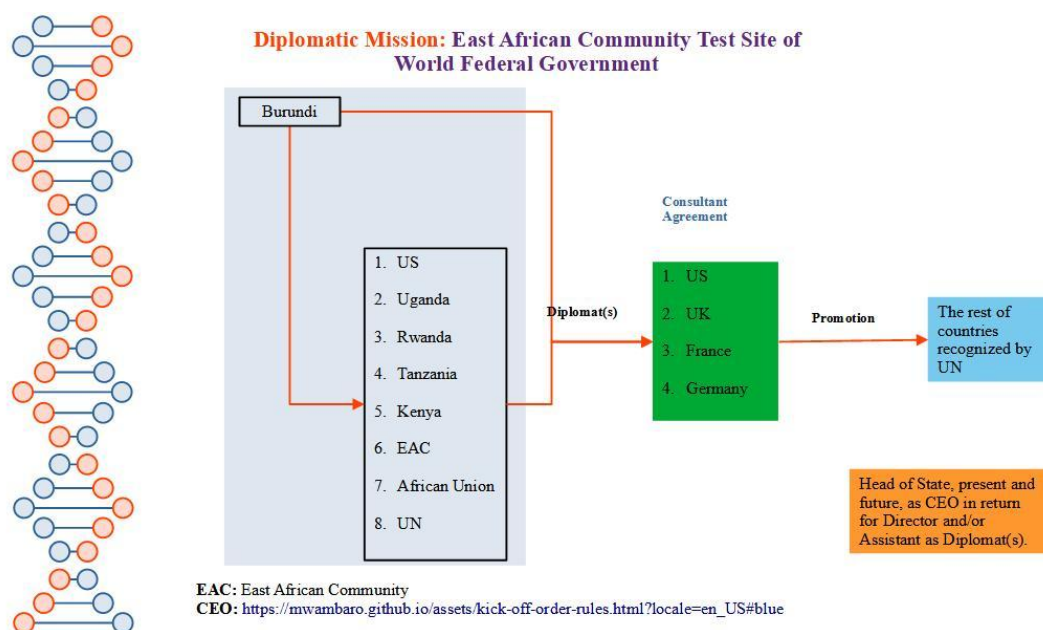

We will nominate the UN Secretary General and all future ones as **CEO (Project Sponsor)**, who will in return give in marriage to the Director a UN diplomat lady who will coordinate the activities of the rest of the assistant ladies around the world. This will make **the Special UN integration Commission** a possibility.

How can countries/kingdoms show cooperation? Let's take East-African Community (EAC) as an example. Same will apply to other regions of the world, such as Arab League, European Union, etc.

There has been an onslaught of civil crises on the East African Community (EAC) (no recent international conflict) since the end of European Colonization in the 1960's. These conflicts have taken advantage of these social features: poverty, low level of industrialization, and low education rate. The countries in the EAC region have welcomed a diversity of solutions, including EAC herself, but foreign countries have consistently had recourse for NGO's. The Common Wealth countries in the region can only cement this strategic approach. Hence, any union, community, federation, or permanent solution to crises in EAC must seriously take this fact into account, let alone the fact that we must meet the national sovereignty constraint. To solve all planet crises, both present and future, we have over the years been advised to set up a **World Federal Government**. Since the architect of this world level solution is native of EAC, Burundi specifically, we will be targeting EAC as its test site. However, we will have to diplomatically involve UK, US, and France, given their large-scale presence in the region, which consequently implies UK, US, France, EAC, African Union, and UN.

The practical strategic approach is appoint the **Head of State** as **CEO (or Project Sponsor)**, who will in turn give in marriage to the Director a diplomat lady who will be **Project Manager Assistant**. Each new Head of State will be serving in this **CEO capacity**. Thus, we will have laid foundation for the **Special Ministry/Department**.

Faithfully Yours,
